able excitement was caused here at 1.46 o'clock this morning by a collision between two sections of a special train of twenty-eight cars used by Walter L. Main's Circus Company. One section, with the engine, was on a side-track in charge of Conductor McKeever. The other section was loading up with animals just beyond the tunnel at Murray Hill.

From Murray Hill to Flushing is a down grade, and the section, instead of being driven by an engine, was allowed to run down of its own momentum. A single brakeman was guiding the cars. Coming into Flushing an attempt to make a flying switch caused the two sections to crash together.
